May 15th, 2018 - sequence is both k automatic and l automatic if and only if it is ultimately periodic Due to the depth and diï¬ƒculty of this result an entire chapter is devoted to it here These two results are completed by the remarkable work of G Christol 1979 on

Automatic Sequences Theory Applications Generalizations
October 11th, 2018 - The Skolemâ€"Mahlerâ€"Lech theorem states that if f n is a sequence given by a linear recurrence over a field of characteristic 0 then the set of m such that f m is equal to 0 is the union of a finite number of arithmetic progressions in m 0 and a finite set
